Agentic Course Creation Canvas

The agent walks the learner's path, the instructor decides, checks come before release.

Course _____ Instructors _____ Run / version _____

Purpose

1 Change
instructor decides

What can learners do afterwards,
in which real situation?

2 Learners
instructor decides

Background, goals, time, equipment
Who is the weakest learner we serve?

3 Learning goals
instructor decides

Observable: "can …"
What the course does not cover

4 Evidence
instructor decides

Which deliverable shows each goal?
Criteria, certificate

Design

5 Constraints
agent drafts

Sessions, workload budget, dates
Platforms, tool costs, licenses

6 Assumed knowledge
instructor decides

What learners know, have and have done
Everything else: taught before it is used

7 Design decisions
instructor decides

Sequence, project, format, tools
Source of truth for each fact

8 Checks
agent drafts

Alignment, boundary, workload, links
Consistency, nothing private made public

Build and improve

9 Resources
agent drafts

Per unit: instructor, participant, code
Draft · checked · released

10 Learner signals
agent drafts

Walkthroughs per persona before release
Questions, quizzes, gaps after

11 Improvements
instructor decides

What changes now, what next run
Which signal became a check or rule

Open questions
Who resolves it, by when?

Decision log
Date · decision · reason · alternatives

☐ Instructor decides ☐ Agent drafts, instructor approves
